# YOUR CLIENTS EXPECT THE BEST. SO SHOULD YOU.

In today's salons and spas, it's essential that towels, robes, capes and spa linens are perfectly, quickly and efficiently cleaned — ready for the next cut, color or spa treatment. That's why it's important to choose the right laundry equipment — washers and dryers specifically engineered to serve the beauty industry with unmatched programmability, energy efficiency and durability.

At Continental Girbau, we design energy-efficient washers and dryers that drastically improve laundry productivity, efficiency and cleanliness. Simply stated, our washers and dryers do more in less time, using less labor and energy. And, unlike home-style washers and dryers, Continental, LG and Econ-O washers and dryers are commercial-grade machines — designed for the constant use that salons and spas require.

Expect the best. Rely on Continental Washers and Dryers to deliver unmatched performance, durability and efficiency, along with the “little extras” — moisture sensing technology for longer linen life, a highly programmable control for an unrivaled clean, and a fire extinguishing system to eliminate dryer fires.

Built for commercial use, Continental, LG and Econ-O washers and dryers are backed by industry-leading factory warranties and local technical support.

“One of the reasons we purchased the high-speed Continentals was to reduce the energy we use on the dryer by reducing drying time. Now the towels come out of the washers barely damp and we’ve reduced dry time by 25 percent.”

**- RON THOMAS**  
VICI SALON & SPA, MILWAUKEE, WIS.

# HIGH-PERFORMANCE WASHER-EXTRACTORS

Continental, LG and Econ-O washers are geared to serve salons and spas by properly cleaning a variety of items — towels, sheets, rags, capes, and more — quickly and efficiently.

## **FLEXIBLE CONTROLS**

Continental washers deliver unmatched cleaning power thanks to advanced programmability. This ensures color stains, chemicals and oils are removed and customers can enjoy cleaner, fresher towels and linens! Continental's chemical injection system automatically injects detergents, bleach and softeners into each load, at precisely the right time, water temperature and water level for optimum efficiency and results. Econ-O and LG washer programs are less sophisticated, but still offer programmability for savings in water and energy usage. Operators simply enter a program and press start!

## **HIGH EXTRACT SPEEDS GET LAUNDRY DONE FASTER**

Continental and LG soft-mount washers produce extract speeds up to 414 G-force! Why are higher extract speeds better? As extract speed increases, so does the amount of moisture removed from every load. By eliminating more water, dry time is reduced, which improves laundry productivity, cuts energy usage and extends linen life. Slash dry time by up to 65 percent and dramatically boost productivity. No more laundry pile-ups.

## **BECAUSE SPACE MATTERS**

Continental (E-Series models), LG and Econ-O-Wash washers are available in freestanding models. They slide into place without reinforced concrete foundations and bolts, so they are simple and less costly to install and relocate. Available in compact designs, Continental and LG small-load washers fit into the same space as most top-load washers, yet offer more than 40 percent greater capacity. Additionally, small-load Continental, LG and Econ-O washers and dryers are available in stacked configurations for optimum use of floor space.

## **DURABILITY UNMATCHED**

Continental, LG and Econ-O-Wash washers are engineered for the rigors of constant commercial use! Continental washers feature AISI stainless steel inner and outer drums, a heavy-duty pump that allows pet hair to pass through the drain, oversized bearings, a quality sealing system and heavy-duty door hinges. Similarly, light-commercial LG and Econ-O-Wash washers offer durable construction and robust doors. All brands are backed by industry-leading manufacturer warranties. Warning: Don't purchase a home-style machine from a big-box store or appliance outlet! Once utilized in a salon/spa application, its warranty is null and void.

## **WATER SAVING FEATURES**

Advanced technology on Continental and LG washers allow for superior wash quality using considerably less water than many competitive washers. Both small-load washer brands use just over 13 gallons of water per load and are Energy Star qualified. Continental Washers offer a sump-less design, exclusive AquaFall system and a programmable control for slashed water usage. Less water used equates to less water heated and additional savings in utilities. Meanwhile, top-load Econ-O-Wash Washers use 27.3 gallons of water per load.

“The speed and G-force of the washer makes loads easier to dry. We are running more loads through the dryer at a quicker rate.”

- DICK BORRESON  
SALON & SPA VISAGE  
KNOXVILLE, TENN.

# HIGH-PERFORMANCE DRYING TUMBLERS

Engineered for fast, safe and efficient drying, Continental, LG and Econ-O- Dryers are available in 20- to 85-pound capacity single-pocket models and 20- 30- and 45-pound capacity dual-pocket stacks. The dryers, featuring quality internal components and easy-to-use controls, are engineered to dramatically boost laundry productivity and energy efficiency.

## PROGRAMMABILITY & FLEXIBILITY

Continental, LG and Econ-O Dryers bring a range of programmability and control flexibility to salons and spas. Continental Dryers offer the most programmability with a microprocessor offering multiple programmable cycle types — time-dry, auto-dry or optional moisture sensing drying. Continental's Linen Life Extension (LLE) shuts the dryer off when a load has reached its preset target level of dryness, helping to prevent over drying and fabric damage. LG Commercial Dryers offer four cycle options — Whites & Color, Permanent Press, Delicates or No Heat. LG's intuitive programming allows salon and spa laundries to manage a variety of functions, including cycle time, drying temperatures, cool-down time and top-offs. Econ-O-Dry Dryers feature delicate, permanent press, no heat and normal cycles. A convenient timer allows the operator to manually select dry time according to load type and size.

## SIMPLE OPERATION & ERGONOMIC

Despite advanced technology, Continental, LG and Econ-O dryers couldn't be easier to use. Once programmed, operators simply select a program number and press start. Oversized doors simplify loading and unloading.

## DURABILITY UNMATCHED

Continental and LG drying tumblers are constructed for the rigors of constant use. Continental dryers feature dual motors with overload protection; steel front, side and top panels coated inside and out with electrostatically applied, baked-on paint for superior bonding and corrosion resistance; an all-belt drive system with cast iron pulleys; and permanently sealed bearings for quiet, low-maintenance operation. LG commercial dryers offer a streamlined, modern look, and a robust, stainless chrome door and stainless drum. They are backed by industry-leading commercial factory warranties.

## FIRE SENSING & EXTINGUISHING

Continental Pro-Series II single-pocket dryers feature an optional Integrated Sprinkler System (ISS), a sensing and extinguishing device that squelches dryer fires before they get out of control. Available on gas and steam units, ISS ensures salons and spas are better protected from dryer fires caused by massage and therapeutic oils in towels and sheets.

## BECAUSE SPACE MATTERS

Pro-Series II Stack60 and SuperStack90 Drying Tumblers pack more capacity and productivity into a smaller footprint. Both models fit easily through a standard door opening, yet deliver 20 percent greater capacity, respectively, when compared to most 50- and 75-pound capacity single-pocket dryers! Continental, LG and Econ-O dryer models are available in 20-pound capacity stack units, as well.

“Before, there was always an odor in the laundry room and stains on items. Now, laundry smells clean and looks so much better.”

– DICK BORRESON  
SALON & SPA VISAGE, KNOXVILLE, TENN.

# CONTINENTAL GIRBAU INC. & GIRBAU GROUP

Continental Girbau Inc. (Continental) was established in 1995 as the North American subsidiary of the commercial laundry equipment manufacturer, Girbau Group, headquartered in Vic, Spain. Family owned, Girbau employs more than 800 people throughout its corporate headquarters in Vic and 15 subsidiaries throughout the world. It markets its industrial and commercial laundry products to more than 90 countries worldwide.

## THE TOTAL LAUNDRY SOLUTION

Continental delivers the total laundry solution to vended, on-premise and industrial laundries throughout North America. As the provider of highly efficient batch tunnel washers, washer-extractors, drying tumblers, feeders, ironers, folders and related machinery, Continental serves the complete laundry production and efficiency needs of virtually any application. Proven durable and reliable, Continental laundry systems are engineered for unrivaled productivity, efficiency and ease of use.

## OUR MISSION: YOUR SUCCESS

Continental's mantra — "Our Mission: Your Success" — reflects the company's commitment to its distributors and customers. We offer robust laundry systems backed by unrivaled customer care.

## SIZING & CONFIGURATION

Every laundry operation is unique, with a distinctive set of production and efficiency goals. Uniquely, Continental Girbau, LG and Econo laundry products offer the flexibility and programmability to meet any need — boosting production and lowering labor, water and energy usage. Continental's team of experts work closely with facilities to properly size equipment for improved laundry room efficiency and productivity.

## FINANCING

Financing allows you to retain full ownership of your business and its assets while helping to preserve your cash, liquidity and revolving lines of credit for emergency use, working capital and other investments. Through CustomSelect Financing, Continental Girbau offers flexible financing and competitive fixed rates to all qualifying applicants.

## ENVIRONMENTALLY FRIENDLY

Continental laundry products meet rigorous environmental and safety standards established by the International Organization for Standardization (ISO), including ISO9001 and ISO14001. Ever focused on laundry efficiency, Continental Girbau is a member of the U.S. Green Building Council (USGBC), a 501(c)(3) nonprofit that developed the Leadership in Energy and Environmental Design (LEED) Green Building Rating System.
