| Summary           | <p>X to B voltage conversion kits allow field conversions from 200-240V to 100-120V for new design 6 (13<sup>th</sup> position in the model number) tumble dryers.</p> <p>This kit <b>cannot</b> be used to convert 120 VAC to 200-240 VAC tumblers.</p> <p>GNA has released similar voltage conversion kits for previous design tumble dryers (Design 3). Refer to tables below for kit part numbers and descriptions.</p>                                                                                                                                                                                                                                                                                                                                                                                                                        |                      |             |              |                   |                 |               |                                      |              |  |                 |                         |                      |             |              |                   |                 |               |                                      |              |          |   |             |     |   |                 |                         |                      |             |               |   |             |     |   |             |          |   |             |     |   |
