ProDry2+

SLS30X2+ | SLS45X2+

High-Performance Stack Drying Tumblers for Athletic Laundries

Designed to pack more capacity and productivity into a smaller footprint, ProDry2+ Stack Drying Tumblers deliver unmatched drying efficiency, superior programmability and ease-of-use. The twin-motor ProDry2+ Stack Dryers deliver premium features that work in concert to dramatically increase laundry productivity, reduce uniform wear and enhance drying quality and efficiency.

Productivity & Efficiency Redefined

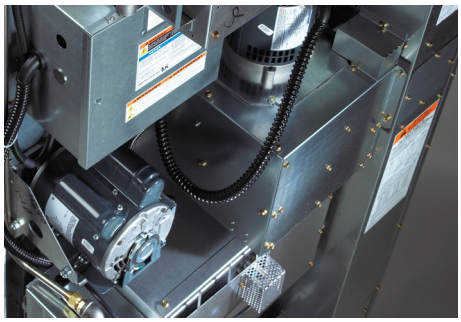

Quality, Standard Reversing & Efficiency

- Standard reversing improves quality and reduces roping and tangling, especially on large, bulky items — providing a more even dry.
- The twin motors driven by OneDrive, an inverter motor control, combine to reduce start up time, require less amperage at ramp up, deliver precise speed control and lower noise levels.
- An instant electronic-spark ignition and modular electrical system contribute to reliability and easy servicing.
- A multiple-burner heat system efficiently and quickly reaches desired temperatures.
- An enclosed heat system captures intake air and preheats it before entering the tumbler — reducing energy costs without increasing dry time.

Cut Ownership Costs with ProDry2+

- Engineered for quick drying and efficiency, ProDry2+ Dryers balance drying time and BTU consumption to reduce energy usage and labor costs.
- They maximize laundry throughput by reducing dry cycle times to more closely match wash cycle times.
- ProDry2+ Dryers balance quick drying with energy-efficiency for unmatched results and a reduction in costs.

Greater Capacity: Smaller Footprint

- Two stack dryer models:
  - SuperStack90 with two 45-pound capacity pockets
  - Stack60 with two 30-pound capacity pockets
- Stack models deliver 20 percent more drying capacity when compared to comparable capacity single-pocket model.
- Greater production in less space spells operational savings for your laundry!
- They fit easily through a standard 36-inch door for simple installation.

Easy Maintenance & Safety Features

- Components are easily accessible.
- An automatic backdraft damper prevents outside air from entering the laundry room.
- Oversized steel doors with reinforced metal door bars and hinges for superb ergonomics and durability.
- With a minimum rear clearance of 18 inches, safety guards and a fully enclosed rear area provide operator protection.

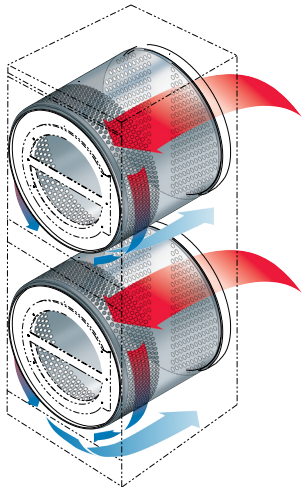

Unmatched Durability

- The tumblers feature rugged stainless steel cylinders; twin motors powered by OneDrive, steel front, side and top panels coated inside and out with electrostatically applied, baked-on paint for superior bonding and corrosion resistance.
- An all-belt drive system with cast iron pulleys and permanently sealed bearings provide quiet, low-maintenance operation.
- Durable kick-plates and cart bumpers protect tumblers from nicks and scrapes.
- An exclusive annealed stainless steel backplate contributes to longer machine life and also reduces friction against tumbling laundry — extending uniform life.
- Backed by an industry-leading warranty.

Engineered for High Performance

Axial Airflow for Small-Load Efficiency

- Engineered with axial airflow, heated air is direct through the load from back to front.
- Perforated cylinders and drum lifters maximize airflow and tumbling action while also preventing tangling for fast, efficient drying.

Control Flexibility

ProDry2+ Dryers offer two programmable controls — the **Dual Digital Control** or the premier **Microprocessor Control**.

Dual Digital Control

- Simple to use, efficient and reliable.
- Allows the operator to choose temperature selection and cycle time and a single push to start operation.

Microprocessor Control

- Features a clear, prominent display that's glove friendly and durable.
- Offers up to 20 programmable cycles and reversing as a cycle add-on. The control also features:
  - Reminder to clean the lint screen
  - Anti-wrinkle and extended tumble initiates unheated tumble action after the end-of-cycle signal
  - External end-of-cycle output to aid operators in noticing when a load is complete
  - Programmable reversing and rotation time
  - Rapid advance option
  - Auditing on LED display
  - Time-dry, auto-dry and moisture sensing

Dual Digital Control

Microprocessor Control

Innovative Moisture Sensing Technology

- An optional Uniform Life Extension (ULE) moisture sensing system prevents over drying and damage to fabrics.
  - It targets any dryness level from zero to 40 percent, and to ensure accurate moisture readings, the ULE system provides an extremely large load-to-surface contact area.
  - Unlike some moisture sensing systems available, Sports Laundry System's ULE system uses the entire surface area of the lifters within the dryer cylinder as sensors.
    - 20 programmable cycles
    - 12 programmable dryness levels from zero to 40 percent
    - Programmable heat time
    - Dry goods experience less damage with up to 31 percent less fiber loss
